

SPRAY SYSTEM SOLUTIONS

For **ALL** Manufacturers' Evaporative Cooling Equipment
EVAPCO®, **BAC®**, **MARLEY®**, **IMECO®**, **RECOLD®** and more...

Spray Distribution System Upgrades

EVAPCO's custom engineered spray distribution systems can be designed for any manufacturer's counterflow cooling equipment. Utilize EVAPCO's EVAPJET® nozzles on open towers or EVAPCO's ZMII® nozzles on coolers and condensers. This upgrade can restore flow that has been lost due to clogged branches or damaged nozzles.

The Best Warranty Protection

All spray system upgrades on competitor's equipment come with EVAPCO's two year warranty. That is double the warranty of other equipment suppliers!

Reduce Maintenance

EVAPCO's research and development team have designed our spray systems to reduce your workload. The distribution upgrade includes new spray branches with nozzles installed for optimal flow. EVAPCO nozzles have wide orifices to reduce clogging, zero moving parts to reduce wear, and are threaded for easy removal. EVAPCO's PVC spray branches also include cleanouts for easy maintenance.
