HOFFMAN & HOFFMAN, INC.

Hoffman & Hoffman, Inc. was founded by brothers Harry & Louie Hoffman in 1947. Since then, our founding principles have remained at the core of everything we do – business integrity, first-class service, innovation and a commitment to our customers. Our dependable quality, reliable delivery and knowledgeable service have made the Hoffman Companies a market leader in HVAC products and service, control systems and energy solutions. With 14 regional offices serving the HVAC marketplace throughout the Carolinas, Virginia and Tennessee, our sales engineers can assist you in HVAC, filtration and energy saving projects. We have the capabilities and products to customize systems to meet the exact needs of every project.

Hoffman
Mechanical Solutions, Inc.

**Replacement Parts
Over 2,000 Items in Inventory**

At Hoffman Mechanical Solutions, Inc., our first class service, highly trained technicians and outstanding customer service should make us your first choice for aftermarket service. Our dedication to aftermarket service is reflected by our 24/7 emergency repair service availability. We also provide flexible service contracts and assistance to meet the needs of our customers.
24-Hour Service: 855-761-HVAC.

Hoffman & Hoffman, Inc. is committed to aftermarket support by the stocking of a large inventory of replacement parts for the equipment we sell. We have a dedicated staff of full-time technicians who identify and provide parts from one of our three warehouses and directly from our manufacturers. We are able to provide one-day delivery throughout the Carolinas and Virginia, and two-day delivery in Tennessee.

For more than 50 years, Marvair[®] packaged wall and floor mounted air conditioners and heat pumps have been the ideal HVAC systems for a wide variety of applications including offices, schools, industrial applications, telecommunication shelters and general purpose use. Marvair self-contained systems are factory assembled and thoroughly tested. All components are readily accessible for easy service. Energy efficient operation keeps operating costs to a minimum.

All Marvair air conditioners and heat pumps are tested and rated in accordance with AHRI standard 390, "Performance Rating of Single Package Air-Conditioners and Heat Pumps" and listed in the AHRI Single Package Vertical Units (SPVU) directory.

ComPac[®] wall mount air conditioners are used to cool telecommunication shelters and electronic equipment rooms.

Cooling Capacities: 1-6 Tons (12,000-72,000 BTUH)

Classic heat pumps offer a complete range of factory installed ventilation options are available including the GreenWheel[®] and GreenCube[®] Energy Recovery Ventilators.

Cooling Capacities: 2-5 Tons (24,000-60,000 BTUH)

Scholar air conditioners and heat are vertical units installed in the classroom with a variety of ventilation configurations.

Cooling Capacities: 1.5-5 Tons (14,000-60,000 BTUH)

ModPac[™] wall mount air conditioners are used primarily in the commercial modular & classroom markets.

Cooling Capacities: 1-5 Tons (12,000-60,000 BTUH)

GreenPac[™] & **GreenPac HGR**[™] wall mount air conditioners feature the Marvair GreenWheel[®] ERV energy recovery ventilator to meet ASHRAE ventilation requirements & control humidity levels.

Cooling Capacities: 2-5 Tons (24,000-60,000 BTUH)

GPac[™] wall mounted air conditioners with gas heat are ideal for schools, modular buildings, or any other facility with significant heating demands.

Cooling Capacities: 2-5 Tons (24,000-60,000 BTUH)

Heating Capacities: 45,000 - 125,000 BTUHs

Marvair Marine remote condenser air conditioners and air handlers are designed for both new installations and for replacement of older, less efficient units in marine applications.

Cooling Capacities: 5-20 Tons (60,000-240,000 BTUH)
